Logitech Astro A50 Wireless gaming headset	1	£240
Samsung Samsung HW-B550 Soundbar and subwoofer	1	£149

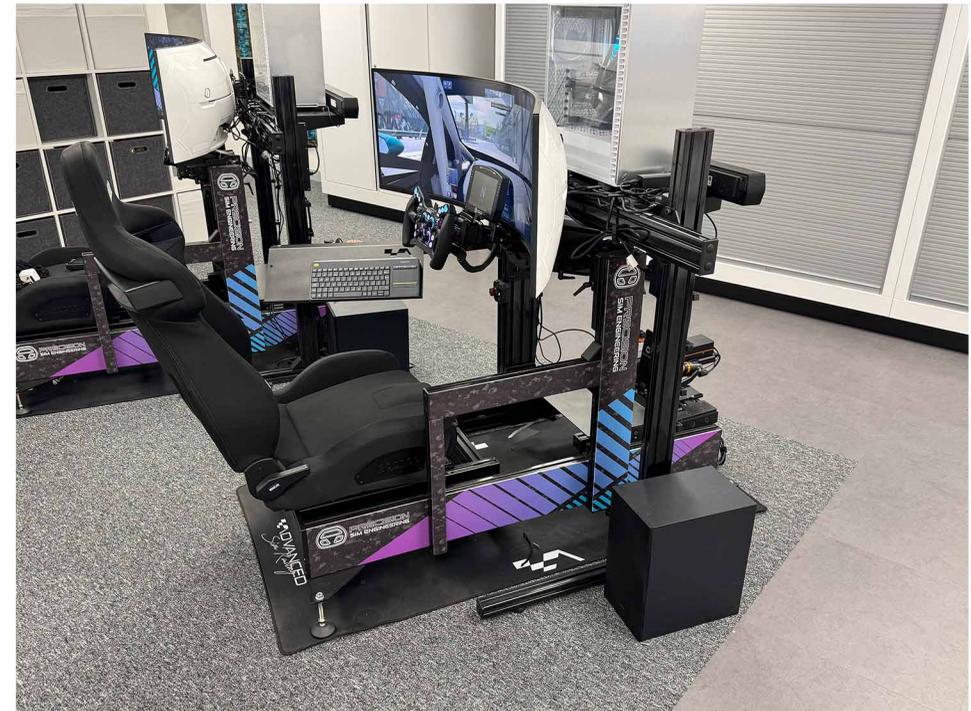

Advanced SimRacing ASR-Pro Chassis

The ASR Pro is widely regarded as the gold standard among sim racing chassis, recognized across the community for its uncompromising rigidity, precise adjustability, and professional-grade performance.

The ASR Pro is built using our Generation 2 'Flat Face' aluminum profile, designed for stability, adjustability, and clean cable-routing through integrated channels. Paired with durable powder-coat finishes in Matte Black or Infinite Black, the chassis offers a refined, motorsport-inspired look that complements any high-end build.

A reinforced 6" aluminum base and rock-solid fixations ensure a zero-flex driving experience, even when paired with the most powerful direct-drive wheelbases and hydraulic pedal systems. The ASR Pro's highly adjustable wheel deck and pedal systems make it easy to fine-tune your driving position or switch between different wheel types in seconds.

Designed to deliver dependable performance, long-term durability, and a tailored driving position, the ASR Pro continues to be the preferred choice for sim racers who want a cockpit that performs at the highest level—every session, every race.

Simucube SC2 Pro + SC2 Quick Release

Automatic profile switching between cars and simulators

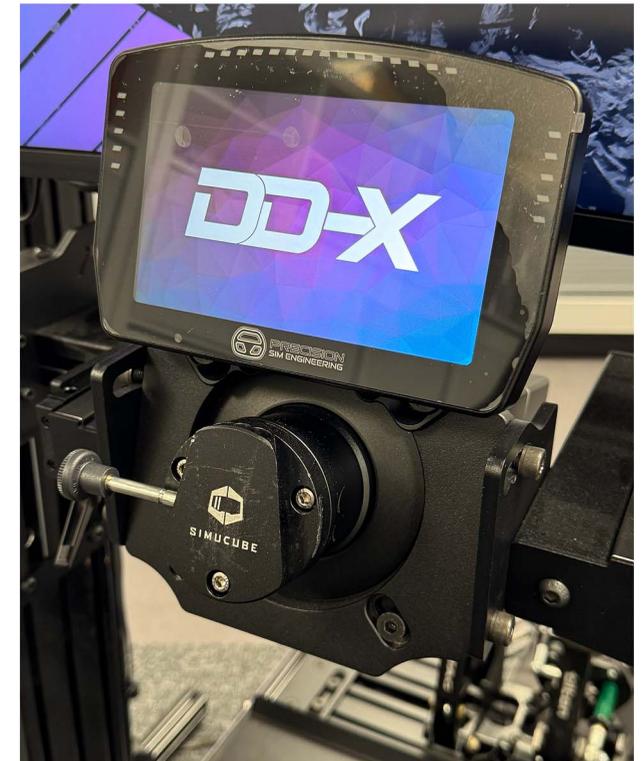

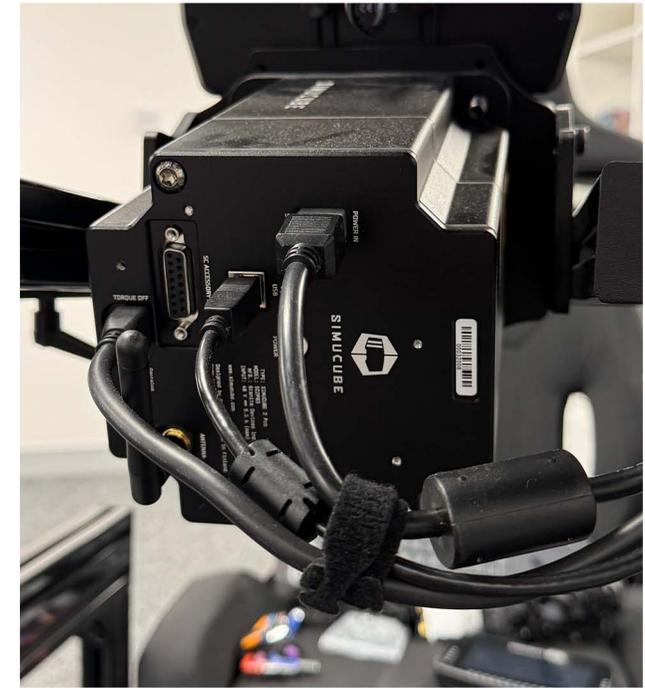

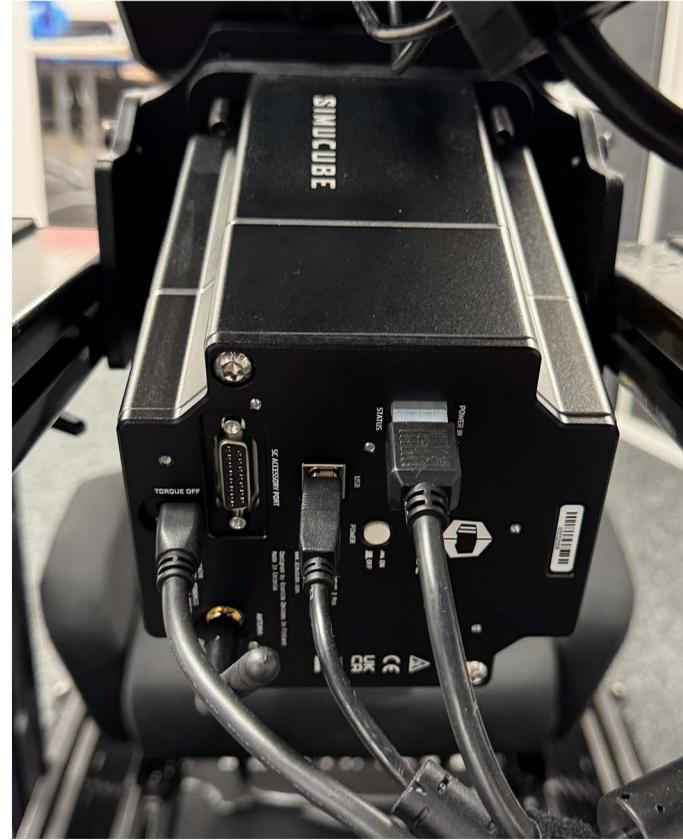

Ready made car profiles by professionals and the community

Industrial-level hardware designed to last

Detailed, smooth, and powerful force feedback (25Nm of torque)

The Simucube 2 Pro offers excellent sensations in terms of detail, providing superior feedback that captures every nuance of the road. What sets this base apart is its exceptional control, delivering movements that feel more solid and realistic.

With the TrueDrive software, you have the freedom to customize and fine-tune advanced settings, allowing you to achieve your ideal configuration based on your personal preferences. Whether you need precision, smoothness, or a balance of both, the Simucube 2 Pro adapts to your unique driving style, ensuring a top-tier sim racing experience

Precision Sim Engineering ES-Pro Wheel

The ES-Pro is based on our brand new Select-X control architecture which provides 109 mappable inputs, full telemetry-controlled RGB lighting, and a host of innovative features that will elevate your sim-racing experience. It is USB pass-through ready, so you can join the cordless revolution when the time comes.

With a full billet Aluminium construction and perfectly contoured dust-resistant silicone handgrips, the ES-Pro provides all the comfort and control you require from a cutting-edge steering wheel.

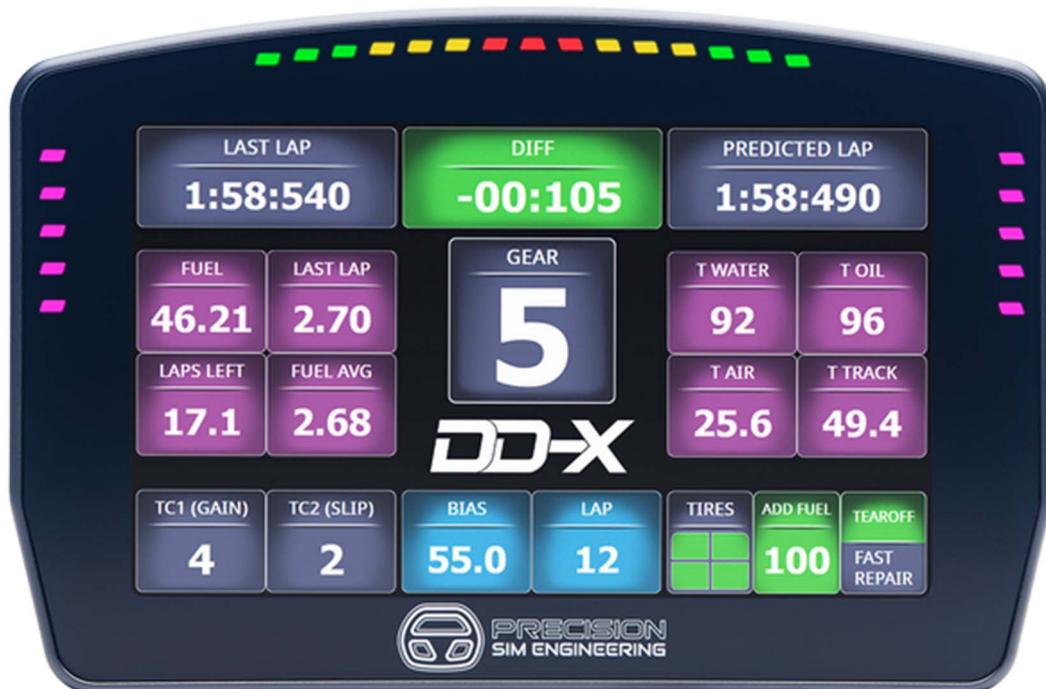

Precision Sim Engineering DD-X Data Display

The DD-X boasts an expansive 6.8-inch, 840 x 480-pixel touch-screen display that delivers information at up to 60fps, ensuring you never miss a moment no matter how intense the on-track battle gets.

Featuring 25 individually adjustable RGB LEDs the DD-X lets you to match the exact shift points of any virtual vehicle, and its 5-15-5 LED layout makes setting up spotter lights, marshal flags, low fuel warnings, and TC/ABS notifications a breeze. With seamless SimHub integration, the DD-X offers easy access to both dashboard and LED controls so you can concentrate on perfecting your racing line.

The DD-X exudes motorsport elegance with its precision-machined enclosure, which is made from aerospace-grade 6061-T6 Aluminium and finished with a deep satin-black anodized coat. The anti-glare Gorilla Glass screen cover helps to reduce reflections, letting the vibrant LCD display shine in any lighting condition.

Sparco R333 Racing Seat

The Sparco R333 Seat provides the perfect combination of comfort and design which is bang up to date.

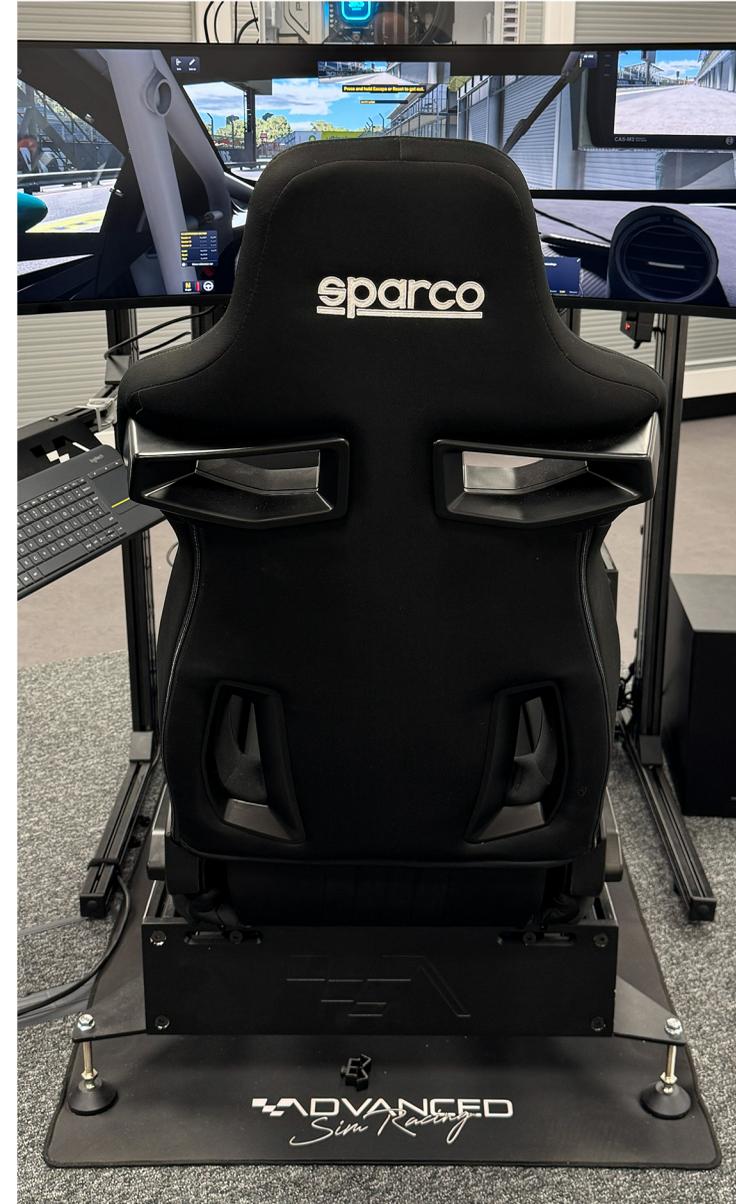

Suitable for road seat belts and racing harnesses.

High-specification upholstery for comfort and durability.

2-Way tilt and recline adjustment.

The seat features a quality finish with the highest standards of upholstery including Fire Zip120 fireproof fabric, and polyurethane foam for an excellent feel, comfort and durability.

The R333 seat offers deep bolster support, ideal for fast road or track days and includes a 2-way tilt/recline mechanism for optimum driving positioning and can be used with standard seat belts or 3 & 4 fixing point racing harnesses.

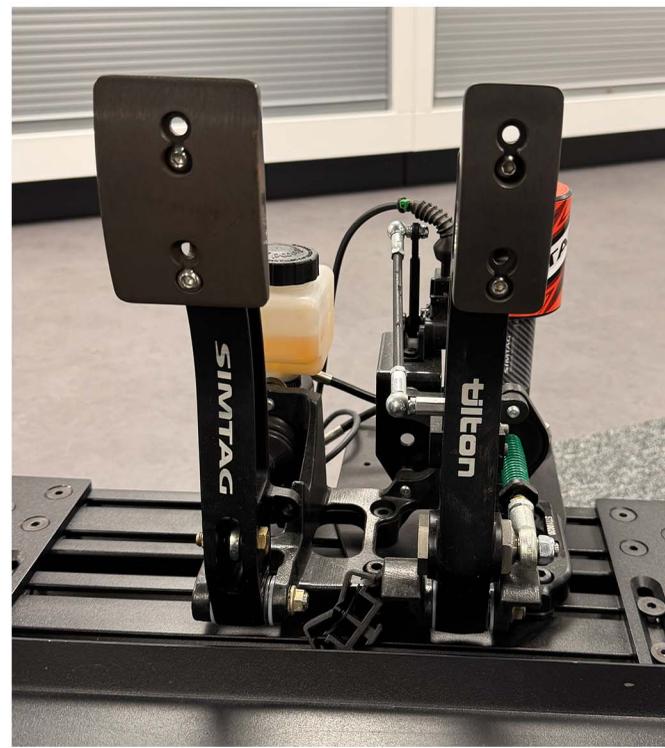

SimTag Iris / Tilton Hydraulic Pedals

The Simtag Iris is forged in aluminum, the pedals are a Tilton 600 pedal set customized by Simtag. The pedal set features a Wilwood hydraulic brake master cylinder and delivers a groundbreaking realism through the new innovative design and has automotive dust and moisture proof connectors for maximum reliability.

The Simtag Iris throttle pedal has a Bosch automotive sensor and pressure sensor to measure the right inputs on the track, while all the pedals can be adjusted via 'Grenade' adjustment cap.

The Simtag Iris are fully adjustable, from the pedal pads to the pedal angles and positioning, the fixed balance bar manufactured by Simtag, enables precise pedal control and the oil-impregnated bronze bushing at pedal pivots results in smoother break force distribution.

The Ashley are compatible only with Simucube Bases and the Simucube software to make calibrations, and can be connected to PC systems via a USB port depending on the option chosen, the two options available are the one with Simucube 2 connection and the one with USB connection.
